

## Writing ordinary numbers II

---

This task is about writing standard form number into ordinary numbers.

The following facts have numbers written in standard form.  
Write each of these numbers as a decimal number.

- a) A truck driver does a return trip from Wellington to Auckland every week.  
In a year he travels approximately  $6.7 \times 10^4$  km

= \_\_\_\_\_ km.

- b) The distance from Earth to the Moon is approximately  
 $3.84 \times 10^5$  km.

= \_\_\_\_\_ km.

- c) The number of seconds in a century is approximately  $3.155 \times 10^9$  seconds.

= \_\_\_\_\_ seconds.

- d) The world 100 metre running record was broken by  $2 \times 10^{-2}$  seconds.

= \_\_\_\_\_ seconds.

- e) The thickness of a page in a mathematics textbook is roughly  $7.6 \times 10^{-5}$  m.

= \_\_\_\_\_ m.
