

# Drawing equivalent fractions

This task is about working with equivalent fractions.

Two fractions that name the same fractional number are called equivalent fractions.

Complete the pairs of equivalent fractions by writing the correct numerator in the box. You may want to draw a diagram to help you.

Here is an example:

$$\frac{1}{4} = \frac{\boxed{2}}{8}$$

You may draw your diagrams here:

a)  $\frac{1}{2} = \frac{\boxed{\phantom{00}}}{8}$

=

b)  $\frac{1}{5} = \frac{\boxed{\phantom{00}}}{10}$

=

c)  $\frac{\boxed{\phantom{00}}}{4} = \frac{6}{8}$

=

d)  $\frac{\boxed{\phantom{00}}}{5} = \frac{6}{10}$

=

e)  $\frac{1}{3} = \frac{\boxed{\phantom{00}}}{9}$

=
