

# Getting a hair cut

This task is about reading percentages and fractions from a pie graph.

Three hairdressers Anahira, Bella, and Cam, between them cut the hair of three-quarters of the people in a town.

The fraction of townspeople who have their hair cut by each hairdresser is shown in the pie chart below.

What **percentage** of the people have their hair cut by Bella?

What **percentage** of the people in the town have their hair cut by Anahira, Bella or Cam?

What **fraction** of the people did not have their hair cut by any of these hairdressers?
