

# How many biscuits?

---

This task is about calculating with weight.

Gladstone School bought 200 cartons of biscuits to sell for fundraising. Each carton contained 15 kg of biscuits.

Each packet of biscuits in a carton weighed 250 g.

*(1000 g = 1 kg)*

a) How many kg of biscuits were there to sell? \_\_\_\_\_ kg

b) How many packets of biscuits were there? \_\_\_\_\_ packets
