

Estimating height and length

This task is about estimating height and length.

In this activity you are going to estimate the height and length of some objects in and around your classroom.

A one metre ruler will be held beside each item.

You will need to make your best estimate (in metres).

a) Estimate the height of a door: metre/s

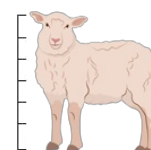

e) Estimate the length of a piece of playground equipment:

c) Estimate the height of a horse: metre/s

d) Estimate the height of a sheep: metre/s

e) Estimate the length of the basketball court: metre/s
