

Estimating temperature

This task is about estimating and measuring temperature.

a)Take your body temperature by placing a thermometer under your arm for two minutes. Write down your body temperature in the space below.

My body temperature is _____ °C

b)Feel the temperature of the water in each of the 3 containers.
Wait at least 1 minute between trying each container.

i) Estimate the temperature of the water in each container.
Write your estimate in the table.

	Estimated Temperature	Actual Temperature
Container 1		
Container 2		
Container 3		

ii)Which temperature is closest to your body temperature?

Container _____

c) Use the thermometer to measure the actual temperature of the water in each container.
Write these temperatures in the table.
