

Volume of cream

This task is about working out the area and volume of a carton.

Volume = area of cross section \times length

Here are two views of a carton of cream.

Calculate the **area** of the vertical cross section (*show your working*).

a)

The **area** = _____ cm^2

Calculate the **volume** of the cream carton (*show your working*).

b)

The **volume** = _____ cm^3

Calculate the **volume** of air in the carton when it has 300 ml of cream in it (*show your working*).

c)

The **volume** of air = _____ cm^3
