

How many millilitres?

This task is about capacity of different containers.

a) About how many millilitres of water will be needed to fill container A? *(Select one)*

☐ 50 ml

☐ 200 ml

☐ 400 ml

☐ 500 ml

b) About how many millilitres of water will be needed to fill container B? *(Select one)*

☐ 100 ml

☐ 400 ml

☐ 700 ml

☐ 1000 ml

c) Fill container A to the top with water.
Then pour the water into the measuring jug to see how many millilitres of water it holds.
Do the same with container B.
Write your measurements in the table below.

Object	Measurement
Container A	<div></div> ml
Container B	<div></div> ml
