

Predicting length

This task is about estimating and measuring length.

Question

a) About how many multi-link cubes will need to be clipped together to make a row as long as the pencil? (*Select one*)

- - 6 cubes
 - 9 cubes
 - 12 cubes
 - 15 cubes

Question

b) About how many multi-link cubes will need to be clipped together to make a row as long as the book? (*Select one*)

- - 13 cubes
 - 17 cubes
 - 21 cubes
 - 25 cubes

Question 1Change answer

Clip the multi-link cubes together to make one row as long as the pencil and another row as long as the exercise book.

c)Write your answers in the table below.

Object	I used
pencil	<input type="text"/> cubes
exercise book	<input type="text"/> cubes

Using a ruler, **measure** how many **centimetres** long the pencil is. Do the same with the exercise book.

d)Write your measurements in the table below.

Object	I measured
pencil	<input type="text"/> cm
exercise book	<input type="text"/> cm
