

Millimetre, centimetre, metre or kilometre?

This task is about the units of measurement for different lengths.

Name the missing unit of length for each of these objects:

My new pencil is 17 *mm / cm / m / km* long ▢

A tree may be 20 *mm / cm / m / km* tall ▢

The fire hose is 25 *mm / cm / m / km* long ▢

A matchstick is 2 *mm / cm / m / km* thick ▢

A plane flies at 10 *mm / cm / m / km* above the ground ▢

The glass in the window is 6 *mm / cm / m / km* thick ▢

The distance across the water between the North Island and the South Island is 25 *mm / cm / m / km* ▢
