

Changing temperatures II

This task is about reading temperature scales on thermometers.

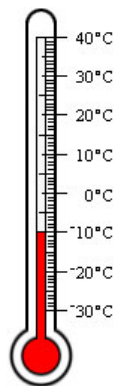

a) What would this thermometer show if the temperature was 5°C colder? °C

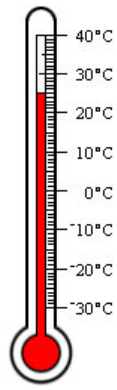

b) This thermometer shows -5°C.

What will it read if the temperature rises by 30°C? °C

c) What would this thermometer show if the temperature increased by 17°C? °C

d) This thermometer shows 25°C above zero.

If the temperature drops 27°C, what will it read then? °C
