

Units of measurement

This task is about choosing the best unit to measure length.

Length can be measured using different units.

mm cm m km
--

Choose one unit from the list that you would most likely use to measure ...

- a) The length of your hand span *mm / cm / m / km*
- b) The height of a kauri tree *mm / cm / m / km*
- c) The width of your finger nail *mm / cm / m / km*
- d) The distance to Niue *mm / cm / m / km*
- e) The thickness of a shell *mm / cm / m / km*
- f) The distance of a train ride *mm / cm / m / km*
- g) The distance of a school swimming race *mm / cm / m / km*
