

# Fitting Together II

This task is about tessellating shapes.

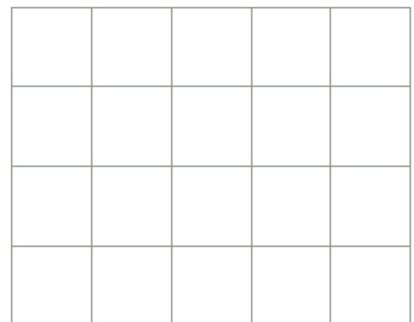

## Practical task

Colour the four shapes on the last page red, and then cut out.

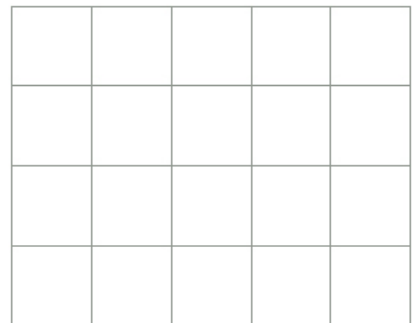

- a) Arrange the four shapes so that they fit exactly on the grid with the **red** sides facing up. Then draw around each shape to show where it fits on the grid.

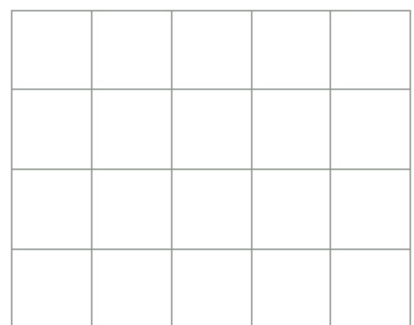

- b) Arrange the four shapes so that they fit exactly on the grid with the **white** sides facing up. Then draw around each shape to show where it fits on the grid.

- c) Arrange the four shapes so that they fit exactly on the grid. There must be at least **one red** side facing up and at least **one white** side facing up. Then draw around each shape to show where it fits on the grid.

- d) Arrange the four shapes so that they fit exactly on the grid. There must be at least **one red** side facing up and at least **one white** side facing up and you must find a way of arranging the shapes that is different from what you did before. Then draw around each shape to show where it fits on the grid.
