

Reflecting on words

This task is about reflection.

The word AVA looks different when it is reflected in a horizontal mirror (a mirror that is placed under the word), but it looks the same when it is reflected in a vertical mirror (a mirror that is placed next to the word).

$$\begin{array}{c} A V A \\ \hline \nabla \wedge \nabla \end{array}$$
Horizontal mirror

$$A V A \quad | \quad A V A$$
Vertical mirror

For each word, select the mirror in which the word will look exactly the same when reflected.

a) Select the type of mirror in which the word will look exactly the same when reflected.

WOW

horizontal mirror vertical mirror both mirrors neither mirror

b) Select the type of mirror in which the word will look exactly the same when reflected.

OHIO

horizontal mirror vertical mirror both mirrors neither mirror

c) Select the type of mirror in which the word will look exactly the same when reflected.

DEED

horizontal mirror vertical mirror both mirrors neither mirror

d) Select the type of mirror in which the word will look exactly the same when reflected.

OXO

horizontal mirror vertical mirror both mirrors neither mirror

e) Select the type of mirror in which the word will look exactly the same when reflected.

TOOT

horizontal mirror vertical mirror both mirrors neither mirror
