

How many times?

This task is about the order of rotational symmetry.

How many times does each shape fit onto itself in one **complete** turn?

a)

The shape fits onto itself times in one **complete** turn.

b)

The shape fits onto itself times in one **complete** turn.

c)

The shape fits onto itself times in one **complete** turn.

d)

The shape fits onto itself times in one **complete** turn.

e)

The shape fits onto itself times in one **complete** turn.

f)

The shape fits onto itself times in one **complete** turn.
