

# Net of an open box II

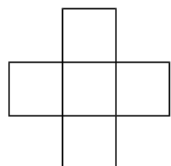

This task is about identifying nets for an open box shape.

Here is a box without a top.

Select **ALL** the nets below that can be folded to make this box.

Here is an example of a net that can be folded:

<input type="radio"/>		<input type="radio"/>		<input type="radio"/>		<input type="radio"/>	
<input type="radio"/>		<input type="radio"/>		<input type="radio"/>
