## **Different views IV**

## This task is about drawing views of objects.

## **Practical task**

Your teacher will place 3 objects together on a desk so that you can view them from all 4 sides (front, back, right side, left side).

- a) Draw the shape of the 3 objects, in relation to each other, from each viewpoint front, back, left side, right side onto your paper. Clearly label each viewpoint.
- b) Using only the drawings you have already made, draw a top view of the shapes of the 3 objects on the desk, in relation to each other, onto your paper.
