

Statements about angles and lines

This task is about geometric terms for different lines and angles.

vertical parallel right
diagonal acute reflex straight
obtuse horizontal perpendicular

Anaru's pet mouse nibbled holes in his maths notes.

Use the words in the box above to fill in the gaps the mouse has made. There will be some words left over.

13 February 2019

a) ANGLES

i) _____ angles are always 90° .

ii) _____ angles are angles that are less than 90° .

iii) _____ angles are angles which measure between 180° and a full turn.

b) LINES

i) _____ lines will never meet. They are drawn like this.

ii) _____ lines are drawn straight up and down.

iii) When two lines meet at 90° they are said to be _____ to each other.
