

# Drawing animal motion

This task is about identifying pathway of motion.

All of these diagrams are drawn from a bird's eye view.

A goat is tied to a pole by a rope.

Which diagram shows the path of the goat as it runs around the pole once, keeping the rope tight?

A dog runs around a house.

Which diagram shows the path of the dog, if it always keeps the same distance away from the house?

A horse runs around a fence.

Which diagram shows the path of the horse, if it always stays the same distance away from the fence?
