# Furniture cubes

**This task is about working out how many cubes are needed, and then making a model.**

For each question,

1. write down the number of cubes you would need to make each model of furniture shown,
2. then use the multi-link cubes to make each model.

a) i) Number of cubes needed to make the chair model [ ]

    ii) Now use the multi-link cubes to make the model of the chair.

b) i) Number of cubes needed to make the bed model [ ]

    ii) Now use the multi-link cubes to make the model of the bed.

c) i) Number of cubes needed to make the table model [ ]

    ii) Now use the multi-link cubes to make the model of the table.
