

Puzzling shapes III

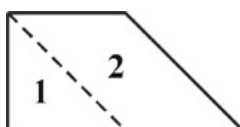

This task is about showing how to make a large shape out of four smaller shapes.

These four pieces of a puzzle can be used to make different shapes.

Show how you could make each of the shapes below by using any **two** of the pieces above.
a) Draw lines on the shapes to show where each of the two pieces will fit. An example has been done.

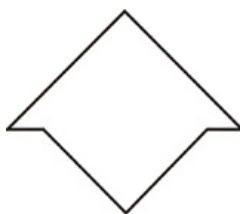

Example:

i)

ii)

b) Show how you could make each of these shapes below by using any **three** of the pieces above.

i)

ii)
