

Parts of shapes

This task is about faces, edges and vertices of different 3-dimensional shapes.

This shape is called a tetrahedron. It has 4 vertices, 6 edges, and 4 faces.

Write in the number of vertices, edges, and faces for each of the following three shapes.

a) This shape is called a cube.

It has vertices, edges, and faces.

b) This shape is called a triangular prism.

It has vertices, edges, and faces.

c) This shape is called a square pyramid.

It has vertices, edges, and faces.
