

Finding the value of n

This task is about finding the value of an unknown number in equations..

Show how to find the value of n in the following equations. [$5n$ means $5 \times n$.]

a) $n - 4 = 13$

$n = \underline{\hspace{2cm}}$

b) $25 = n - 6$

$n = \underline{\hspace{2cm}}$

c) $12 = 3n$

$n = \underline{\hspace{2cm}}$

d) $8n = 4$

$n = \underline{\hspace{2cm}}$

e) $4n + 2 = 22$

$n = \underline{\hspace{2cm}}$

f) $15 = 7 + 2n$

$n = \underline{\hspace{2cm}}$
