

# Number pairs

---

This task is about writing different number sentences with the same answer.

a) Write four different pairs of numbers that add to 8.

$$\square + \square = 8$$

$$\square + \square = 8$$

$$\square + \square = 8$$

$$\square + \square = 8$$

b) Write four different pairs of numbers that add to 17.

$$17 = \square + \square$$

$$17 = \square + \square$$

$$17 = \square + \square$$

$$17 = \square + \square$$

c) Write four pairs of numbers to make these number sentences equal 7.

$$\square - \square = 7$$

$$\square - \square = 7$$

$$\square - \square = 7$$

$$\square - \square = 7$$
