

Commutative number sentences I

This task is about missing numbers that make number sentences true.

a) Find the missing number in each number sentence and write it in the box.

i) $7 + 6 = 6 + \boxed{}$

ii) $23 + \boxed{} = 46 + 23$

iii) $\boxed{} + 67 = 67 + 75$

iv) $87 + 79 = \boxed{} + 87$

b) All the number sentences below are true.

Explain how you know they are true without having to add up the numbers.

$$45 + 63 = 63 + 45$$

$$189 + 52 = 52 + 189$$

$$364 + 817 = 817 + 364$$

$$2,579 + 168 = 168 + 2,579$$
