

4 by 4 Number square II

This task is about completing a number square that sums correctly across the rows and columns.

Cut out the numbers at the bottom of the page and use them to fill in the squares below so that:

- the sum of each row equals the total at the end of that row, and
- the sum of each column also equals the total at the bottom of that column.

You may only use the number cards provided. There will be 8 cards left over.

				Total
	5		4	18
5		3		22
	4	4		19
7			2	20
Total	16	25	17	21
