

# Subtraction and division boxes

This task is about completing equations that have brackets, using only numbers 2-12.

Complete each equation by filling in the boxes.

- Use only the numbers above.
- Each number can be used more than once.
- Make sure you use the brackets correctly.

a)  $(10 - \square) - \square = 2$

b)  $(\square - \square) - 2 = 4$

c)  $17 - (\square - \square) = 10$

d)  $(12 \div \square) \div \square = 2$

e)  $20 \div (\square \div \square) = 5$

f)  $\square \div (\square \div 3) = 1$
