

How many coins?

This task is about working out how many coins make up a given amount of money.

- a) Terri has some 50 cent and 20 cent coins in her piggybank. They have the same number of each coin, and no other coins.

If the coins are worth a total of \$3.50, how many of each coin do they have? _____

- b) Chloe has \$1.80 worth of 10 cent and 20 cent coins. She has the same number of 10 and 20 cent coins, and no other coins.

How many coins does she have altogether? _____

You may use this space for working for both questions.
