

Multiplication squares

This task is about using numbers to complete some multiplication arrays.

Using **multiplication**, fill in the squares in the boxes below so that:

- the numbers **across** each row multiply to the product at the end of the row, **and**
- the numbers **down** each column also multiply to the product at the bottom of each column.
- Only the numbers 1-10 can be used. The same number can be used more than once.

a)

		Product =
2	5	10
		3
Product =	2	15

b)

		Product =
		15
		8
Product =	12	10

c)

		Product =
		18
		20
Product =	30	12
