

Zoe's heartbeat

This task is about graphing a story.

Read the story about Zoe.
Use it to draw a line graph to show how fast her heart was beating at different times of the day.

When Zoe **woke up** in the morning her heart was beating very slowly. After biking to **school** her heartbeat was very fast. While sitting at her **desk** her heartbeat was normal. At **playtime**, Zoe played tag and her heartbeat was very fast. During **reading time**, she felt sleepy and her heartbeat had become very slow. At **lunchtime** Zoe went to kapa haka practise and her heartbeat went really fast. She then went inside to listen to a **story** and her heartbeat went back to normal.
