

Which number?

This task is about identifying number patterns.

Select the number that does **not** fit in each of the following patterns.

<input type="radio"/> 5	<input type="radio"/> 10	<input type="radio"/> 16	<input type="radio"/> 20	<input type="radio"/> 25	<input type="radio"/> 30
-------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------

<input type="radio"/> 4	<input type="radio"/> 8	<input type="radio"/> 12	<input type="radio"/> 16	<input type="radio"/> 19	<input type="radio"/> 24
-------------------------	-------------------------	--------------------------	--------------------------	--------------------------	--------------------------

<input type="radio"/> 36	<input type="radio"/> 33	<input type="radio"/> 30	<input type="radio"/> 27	<input type="radio"/> 24	<input type="radio"/> 20
--------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------

<input type="radio"/> 2	<input type="radio"/> 4	<input type="radio"/> 8	<input type="radio"/> 16	<input type="radio"/> 38	<input type="radio"/> 64
-------------------------	-------------------------	-------------------------	--------------------------	--------------------------	--------------------------

<input type="radio"/> 160	<input type="radio"/> 80	<input type="radio"/> 40	<input type="radio"/> 30	<input type="radio"/> 10	<input type="radio"/> 5
---------------------------	--------------------------	--------------------------	--------------------------	--------------------------	-------------------------
