

Emma's day

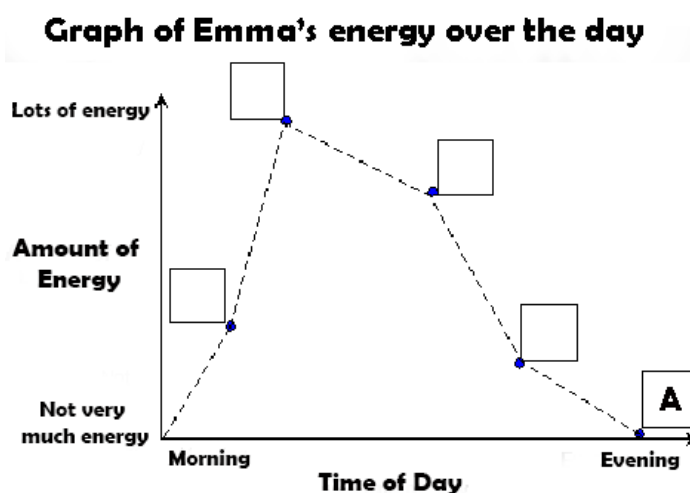

This task is about showing information on a graph.

The graph shows the amount of energy Emma used doing different activities one day. Some of the activities used a lot more energy than others.

This is a list of the activities Emma did:

- A - went to sleep - DONE
- B - watched TV
- C - had breakfast
- D - played with her baby brother
- E - went for a run

Write the letter for each activity (B, C, D, E) in the boxes on the graph to show **how much energy Emma used** for each activity. The letter A has been put on the graph for you.
