

Number items I

This task is about using $+$, $-$, \times and \div with different numbers to make 6.

Questions/instructions

There are many different ways to make numbers.

For example you can make the number 2 like this: $1 + 1$ or 2×1 or $39 + 1 - 38$.

Write down 10 different ways of making the number 6.

Try to make each one as different as possible.

1.

2.

3.

4.

5.

6.

7.

8.

9.

10.
