

# Keeping the house warm

This task is about reducing heat loss.

This diagram shows how much heat energy is lost from different parts of a house.

a) Through which part of a house is most heat energy lost?

<input type="radio"/> roof	<input type="radio"/> walls
<input type="radio"/> windows	<input type="radio"/> draught
<input type="radio"/> floors	

b) Explain **three** things that could be done to parts of this house to help reduce heat loss.

1.

2.

3.

c) What are **two** actions people could do every day, to parts of this house, that could help reduce heat loss?

1.

2.
