

# Low energy home

---

**This task is about design features of a low energy house.**

Your task is to design a low energy home.

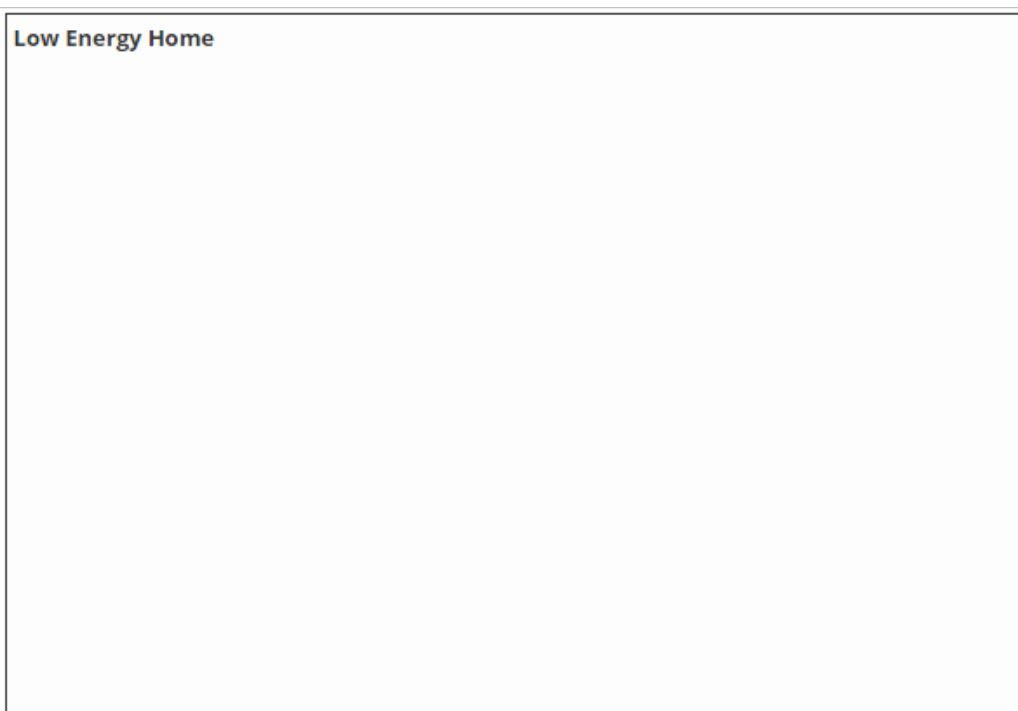

A low energy home has features that save energy and use renewable energy sources.

Draw your house in the box on the next page.

1. Label **four** special energy saving or renewable features in your house.
2. Name the power sources you have used in your house.
3. Explain how these features help save energy.

Label **four** special energy saving or renewable features in your house. Name the **power sources** you have used in your house. Explain **how** these features help save energy.

**Low Energy Home**
