

Bounce height

Ropeti and Tina were investigating how high a ball would bounce when it was dropped from different heights. Here are their results:

Height ball dropped from (metres)	0	1	2	3	4	5
Height ball bounced (centimetres)	0	45	90	135	180	225

a) Complete the line graph below to show their results.

b) Write a label for the bottom axis. _____ ()

What pattern do you notice between how high the ball bounced and the height it was dropped from?

c)
