

# How we hear

---

**This task is about how sound travels to the brain.**

The statements below, which describe how sounds are heard, are out of order.  
Put the statements in order. The first and the last boxes have been done for you.

**Noise comes from a vibrating object.**

**Ear bones vibrate.**

**Ear nerves take to sound messages to the brain.**

**Air particles carry vibrations.**

**Vibrations cause our ear drum to vibrate.**

**Vibrations pass on to air particles.**

**The brain tells us what we hear.**
