

# Planet years

This task is about reading a table to work out how far a planet is from the Sun.

The length of a year is the time it takes a planet to orbit the Sun. Because of the distances in space, the speed the planets travel can be thought of as similar.

Use the information on the length of a year for each planet to answer the questions below.

Planet	Length of Year
A	687 days
B	225 days
C	84 years
D	165 years
E	88 days
Earth	365 days

a) What planet is the **furthest** from the **Sun**?

<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C
<input type="radio"/> D	<input type="radio"/> E	<input type="radio"/> Earth

b) Which planet is the **closest** to the **Sun**?

<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C
<input type="radio"/> D	<input type="radio"/> E	<input type="radio"/> Earth

c) Which planet is the **closest** to the **Earth**?

<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C
<input type="radio"/> D	<input type="radio"/> E	

d) Put the planets in order, from **closest** to the Sun to **furthest** from the Sun.

	<input type="text" value="A"/>	<input type="text" value="B"/>	<input type="text" value="C"/>	<input type="text" value="D"/>	<input type="text" value="E"/>
