

Navigation at sea

This task is about navigation.

Early Polynesian voyagers used their knowledge of sailing and their environment to travel great distances safely.

a) Once a "new land" was discovered the explorers may have wanted to return home.

Name **two** features in the environment they could have used to help navigate their way home:

1.
2.

b) When looking for a "new land", the sailors would be watching for telltale signs of land.

What would **two** such signs have been?

1.
2.
