

Looking at geysers

This task is about geysers and how they work.

Look at the animation of a geyser.

- a) Use the **Aa** tool below to label the **four** boxes on the diagram:
magma | underground water | rock layer | steam and hot water

b) What heats the water?

c) As the water heats up it will take up more and
this increases the pressure and causes the water to come out as steam.
