

Rainfall & temperatures around the world

This task is about reading information off a graph showing rainfall and temperature. Use the graph below to answer the following questions.

Average rainfall and temperature for Tokyo, Los Angeles and Perth

a) In which month does Tokyo receive most rain?

b) Which city has the lowest annual rainfall?

- Tokyo
 Los Angeles
 Perth

c) When temperatures are warm, and moisture is present, there is usually high humidity. Which city is most likely to have high humidity in the month of September?

- Tokyo
 Los Angeles
 Perth

d) Bush fires can occur around Perth when it is hot and dry.

In which month are bush fires most likely?

e) Tokyo and Los Angeles are cities in the Northern Hemisphere. Explain how their temperatures show this.
