

A new town

This task is about using a map to identify the environmental impact of a new town.

a) What do the arrows next to the river show?

b) i) This new town will need drinking water.

Place an "X" on the river to show where this water should be collected.

ii) Why did you choose this area to collect the water from?

c) Name **one** thing the builders of this new town could do to help stop the river from flooding the houses.
