

Where did the water go?

This task is about water that seems to disappear.

Tom's jar

Simon's jar

Tom and Simon left their jars of water on the window sill for a week.

a) After a week one jar still had 1 cm water in it but the other jar was empty.

i) Whose jar was **empty**? *Tom's jar/ Simon's jar*

ii) Where did the water go?

iii) Explain why the other jar still had water in it.

b) i) Does the process of evaporation take place in both jars? *(Choose one) Yes/ No*

ii) Explain why you think this.

c) Maria said "That one is just like the Earth's water cycle".

i) Whose jar was she talking about? *Tom's jar/ Simon's jar*

ii) What do you think she meant? In what ways is it like the water cycle?
