

Cooking potatoes

This task is about fair testing.

Neil set up the following experiment to find ways to speed up the cooking of a potato.

a) Carefully explain **two** reasons why this is not a "fair test".

1.

2.

b) What **two** variables have been controlled for this experiment?

1.

2.

c) Neil re did this experiment and made it a "fair test".

What should Neil **measure** so he knows which potato cooks the fastest, and **how** could he do this?

Measure:

How:
