

Types of paper

This task is about comparing the physical properties of different types of paper.

Different types of paper have different uses.

Draw a line to match the different types of paper with their description. One description is not needed.

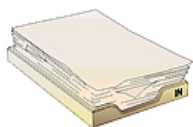

Type of paper

Tissues •

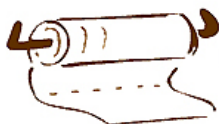

Paper cup •

Photocopy paper •

Gift-wrapping paper •

Paper towels •

Description of paper

- Stiff, strong, has a water-proof wax coating.

- White or pale colours, smooth, will not easily soak up liquids.

- Soft, will easily soak up liquids, white and pale colours, tears easily.

- Strong, cannot be seen through, bright colours.

- Stiff, will not soak up grease or oils, tears easily.

- Strong even when wet, will easily soak up liquids like water and oil.
