

Making bubbles

This task is about fair testing.

Ana and Jen want to find out which is the best washing-up liquid for blowing bubbles. Help them to plan a "fair test".

a) What does "best" mean in the circumstances?

b) How many types of washing-up liquids should they try?

c) What should they measure?

d) What will they need to keep the same?

e) What should they do to make sure their results are more accurate?
