## **Runny honey**

## This task is about investigating viscosity.

## How to do this task

- Place equal amounts of honey in two test tubes.
- Place one test tube in a beaker of hot water, leave for 3 minutes.
- Stand the test tubes next to one another. Hold a marble over each, and let the marbles fall into the liquid.

a) Describe what happened when the marbles fell into the liquid.				
b) Explain why this ha	appened.
