

# Candle in a jar

This task is about observation and burning.

a) i) Hemi looked at the burning candle and said, "This candle is in a draught."

Write **one** observation you could make to support his statement.

ii) What is another observation you could make about this burning candle?

b) i) Hemi put an air-tight container (as shown above) over the candle what would most likely happen?

ii) Why would this happen?
