

# Living on a dairy farm

This task is about relationships between living and non-living things on a dairy farm.

a) A drawing of a dairy farm has been started for you. What other living and non living things might you find on this dairy farm?

Draw and label as many ideas as you can think of to add to the drawing below.

b) A relationship is a connection between 2 things. An example of a relationship in the picture could be:  
The cow eats the grass.

From your picture describe a relationship between **two** things on the dairy farm.

c) Describe some ways in which human activity can change relationships in and around the farm.
