

Living in the ocean

This task is about relationships between living and non-living things in the ocean.

A drawing of an ocean has been started for you. What other living and non living things might you find in and near this ocean?

a) Draw and label as many ideas as you can think of to add to the drawing below.

b) A relationship is a connection between 2 things. An example of a relationship in the picture could be: The jellyfish floats in the water.

From your picture describe a relationship between:

i) two things in the ocean.

ii) one thing on or above the water and one thing in the water.

c) Describe some ways in which human activity can change relationships in and around the ocean.
